Forex Risk Disclosure:

The National Futures Association (NFA) and CFTC (Commodity Futures Trading Commission), the regulatory agencies for the forex and futures market in the United States, require that customers be informed about potential risks in the forex market. If you don't understand any of the information provided on this page, please contact us or seek advice from an independent financial advisor.

Risk Associated with Forex Trading Off-exchange foreign currency trading on margin carries a high level of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite.

The possibility exists that you could sustain a loss of some or all of your initial investment and, therefore, you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with off-exchange foreign currency trading and seek advice from an independent financial advisor if you have any doubts.

TheInnerCircleTrader.com Market Opinions:

Any opinions, news, research, analyses, prices, or other information contained on this website is provided as general market commentary, and does not constitute investment advice. <http://www.TheInnerCircleTrader.com>, Michael J. Huddleston, aka "ICT" and or The Inner Circle Trader will not accept liability for any loss or damage, including without limitation to, any loss of profit, which may arise directly or indirectly from use of or reliance on such information.

Government Required Risk Disclaimer and Disclosure Statement:

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

Trading performance displayed herein is hypothetical. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance trading results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

U.S. Government Required Disclaimer - Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this web site. The past performance of any trading system or methodology is not necessarily indicative of future results. Trade at your own risk. The information provided here is of the nature of a general comment only and neither purports nor intends to be, specific trading advice. It has been prepared without regard to any particular person's investment objectives, financial situation and particular needs. Information should not be considered as an offer or enticement to buy, sell or trade.

You should seek appropriate advice from your broker, or licensed investment advisor, before taking any action. Past performance does not guarantee future results. Simulated performance results contain inherent limitations. Unlike actual performance records the results may under or over compensate for such factors such as lack of liquidity. No representation is being made that any account will or is likely to achieve profits or losses to those shown. The risk of loss in trading can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition.

If you purchase or sell Equities, Futures, Currencies or Options you may sustain a total loss of the initial margin funds and any additional funds that you deposit with your broker to establish or maintain your position. If the market moves against your position, you may be called upon by your broker to deposit a substantial amount of additional margin funds, on short notice in order to maintain your position. If you do not provide the required funds within the prescribed time, your position may be liquidated at a loss, and you may be liable for any resulting deficit in your account.

Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example, when the market makes a "limit move." The placement of contingent orders by you, such as a "stop-loss" or "stop-limit" order, will not necessarily limit your losses to the intended amounts, since market conditions may make it impossible to execute such orders. By viewing any <http://www.TheInnerCircleTrader.com> text, audio, visual commentary, video or presentation, you acknowledge and accept that all trading decisions are your own sole responsibility, and the author, Michael J. Huddleston and anybody associated with <http://www.TheInnerCircleTrader.com> cannot be held responsible for any losses that are incurred as a result.

ICT Price Action Model

30 To 50 Pips Per Week

ICT Price Action Model A Simple Model 30 To 50 Pips Per Trade

Humble Hopes, Humble Beginnings

You do not need a lot of pips to do well in trading Forex. Nor, do you require a lot of technical tools or indicators on your charts.

Consider a simple approach to capturing 30 to 50 pips per week. Not trying to impress social media, or obtain an unreasonable amount of pips, for a new Trader.

This is a simple, no fluff model to get you started on your way to finding a lifetime of pips. Keep it simple, don't over-think it and I'm sure you will do just fine.

The Setup

60-minute Setup

Notice these two particular candles in Price. These two points in the movement of Price show a willingness to decline. The range of that is your setup. It might not appear all that significant to you at the moment, but I will explain the importance in a moment.

The Setup

60-minute Setup

The large Black or "Down Close" Candle is Displacement
In existing momentum, these point to Orderblocks.
The Bearish Orderblock is the Blue arrowed candle.

ICT Price Action Model A Simple Model – 30 To 50 Pips Per Trade

When momentum is moving towards a High Timeframe pool of Liquidity - as I indicated on the Daily chart, we stalk this setup on a 60-minute chart. Price has created a Displacement lower - towards the recent Daily low, noted as the blue line.

Banks will use the last up close candle to add more shorts on - right before the major run into that Liquidity Pool under the recent Daily Low.

Humble Hopes, Humble Beginnings

Now clearly, this is a suggested starting point. It is not the only starting point, but a sound one.

Study previous conditions in hindsight and log these in your study journal. A study journal is a collection of Price Action examples or what we refer to as “Fractals”.

If you like more learning like this visit my YouTube channel The Inner Circle Trader. If you are interested in higher learning, consider my private ICT Mentorship. As always, I wish you Good Luck & Good Trading!
