Build Up

- Always your first step to identify LQ
- If you can't identify your Build Up, stay away
- Sets your focus on clean setups

Inducement

- Last impulse to stop-out Retailers
- Last impulse to make Retailers open Positions
- Usually rapid price movement (Vector)

SIMPLITY ABROACH

1

Relevant BoS

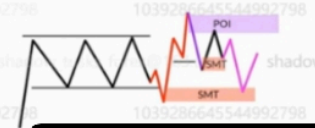

- Confirms the directional shift
- Gives you more confluences and confidence
- Is optional, as sometimes it happens late

Mitigation

- Fills price inefficiencies (Imbalances)
- Comes back to a Supply or Demand Area
- Provides you with a Point of Interest (POI)

LIT

- You have multiple confluences, full cycle completion
- You know your SL, TP and Risk Management
- You use the Execution Helper or Trade Assistant

Theme 2 **CASE 2**

Asia Whipsaw (AWS)

Theme 1

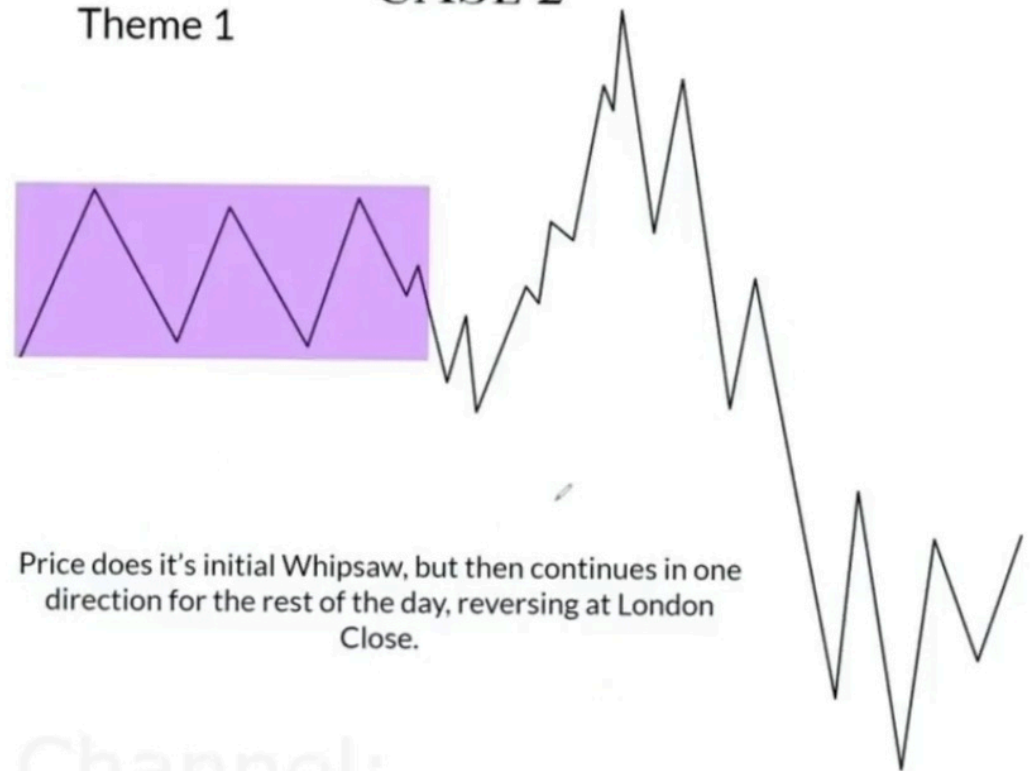

CASE 1

Price has rapid moves for the day jumping from one side to the next in succession but never really going anywhere.

Theme 1

CASE 2

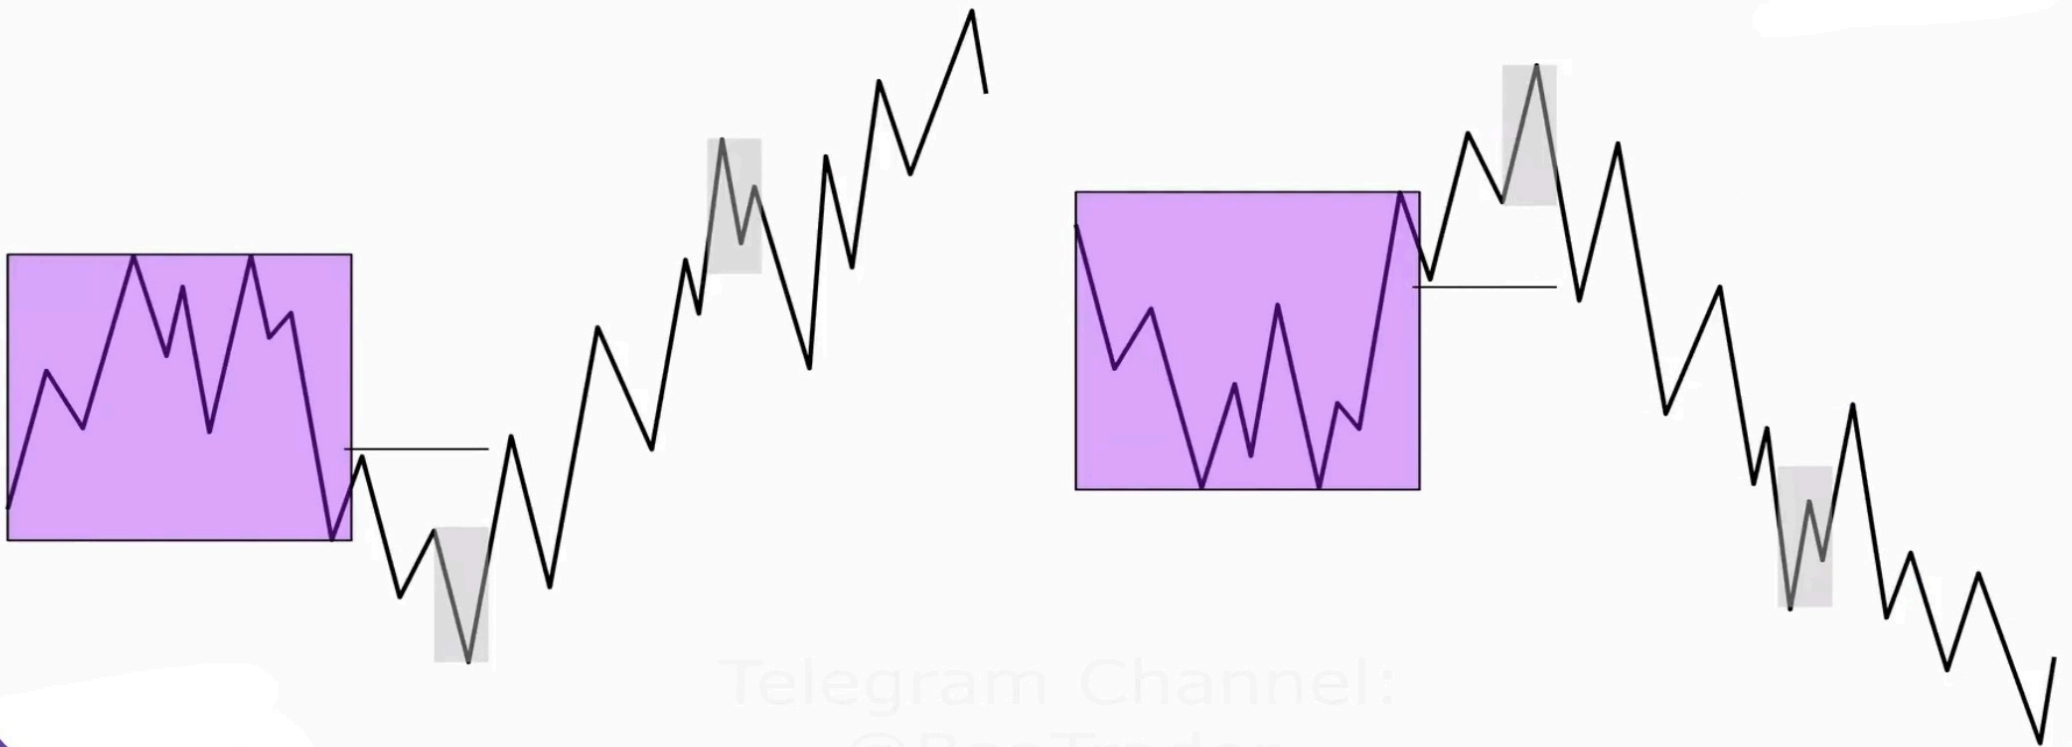

Price does it's initial Whipsaw, but then continues in one direction for the rest of the day, reversing at London Close.
