The pre LIT Basic Master MAP

Basic Entry

1. Supply and Demand

Range or Consolidation

1. Range builds up orders.
2. Supply turns into Demand.
3. Demand Turns into Supply.

These areas provide a Pol (Point of interest)
This allows us to keep watch for reversal
and continuation points.

1. Supply
&
Demand

2. Imbalance

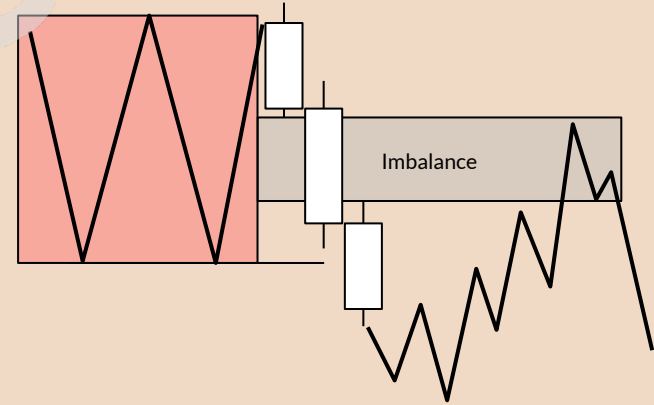

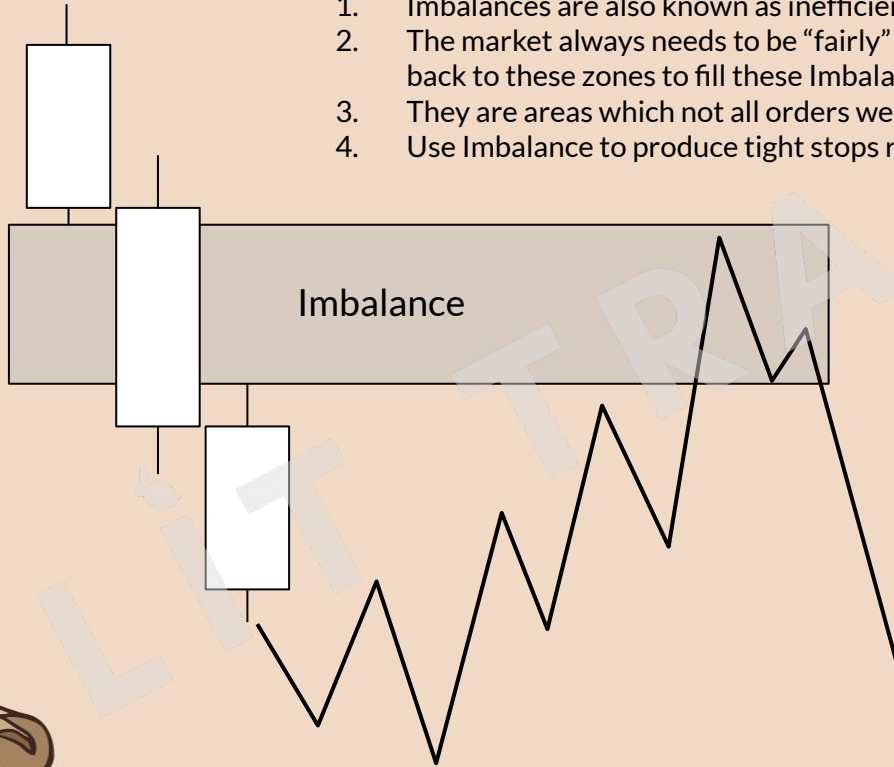

Basic Entry

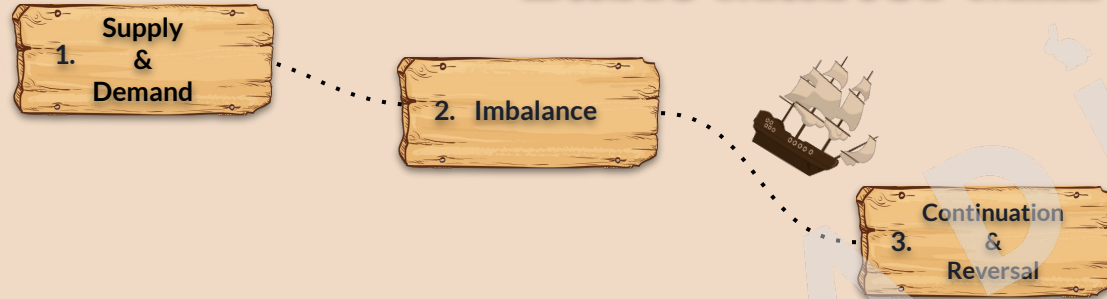

2. Imbalance

1. Imbalances are also known as inefficiencies.
2. The market always needs to be "fairly" delivered, that's why they come back to these zones to fill these Imbalances
3. They are areas which not all orders were delivered in the order books.
4. Use Imbalance to produce tight stops resulting in 1:100s

Continuation

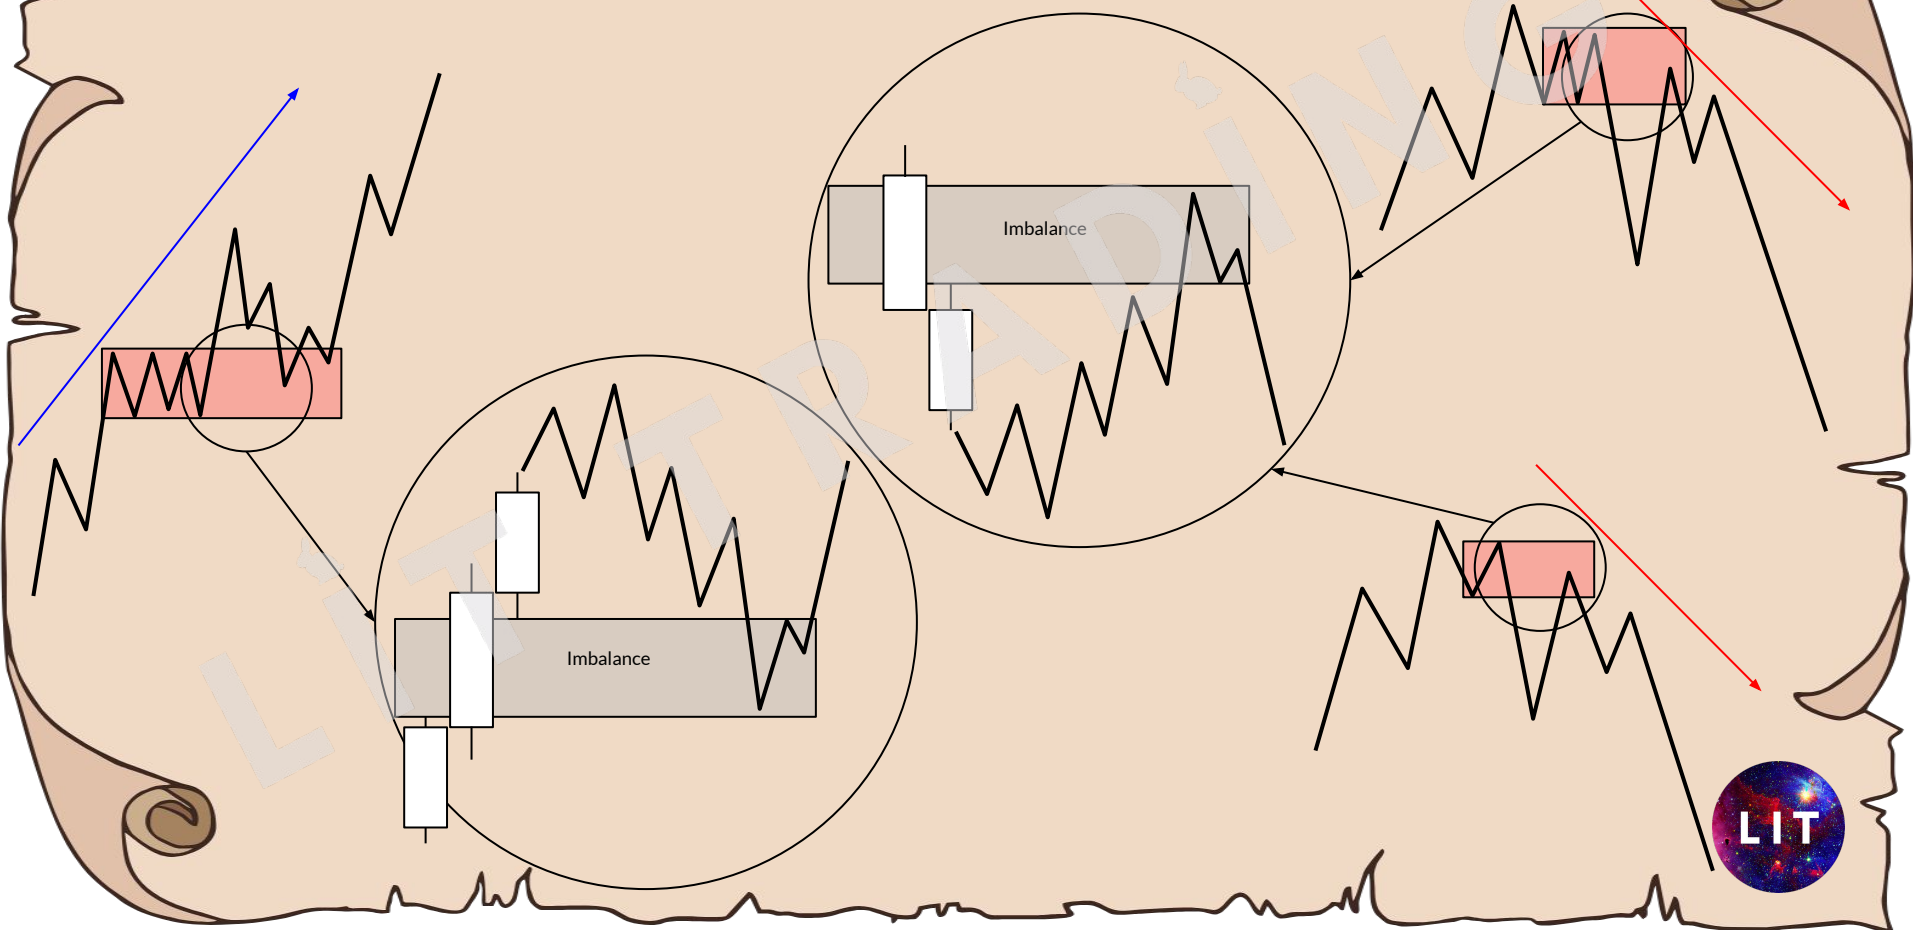

3.

Reversal

1. Continuations are 'Trend Like'
2. Reversals - reverse the Trend.
3. There are conditions to trade either a trend or reversal.
4. We even know when the Continuation will turn into a reversal!

3. In Combination with Imbalance

5. Structure Basics

1. Understand the difference between Main structure and internal structure
2. Internal Structures is “inside” a larger move.
3. These are fractal and happens on all Timeframes.
4. Identifying Internal structures allows you to analyze the likely next type of market behaviour.

8. Liquidity

A screenshot of a dictionary entry for the word 'liquidity'. It includes a speaker icon, the word 'liquidity', its phonetic transcription '/lɪˈkwɪdɪti/', and its classification as a noun in the field of finance. The definition states it is the availability of liquid assets to a market or company, with an example about banks closing. It also lists two bullet points: 'liquid assets; cash' with a sub-example about a firm's ability to pay, and 'a high volume of activity in a market'.

 liquidity

/lɪˈkwɪdɪti/

noun **FINANCE**

the availability of liquid assets to a market or company.
"the banks closed, causing serious liquidity problems for smaller companies"

- liquid assets; cash.
"a firm may be unable to pay unless it has spare liquidity"
- a high volume of activity in a market.

- So essentially it is ALL the money that moves through the market.
- This includes ALL the money that also is sitting in the market waiting to be 'Liquidated'
- Can be Stop Losses, Limit Orders and Stop Orders
- Therefore Stop Losses are seen as Liquidity due to the fact it's entered positions easily liquidated at some point to make high volume of activity exist in the market.
- Since it's what keeps the market moving (ie: Liquid) The market naturally gravitates to Liquidity Areas.

8. Liquidity

THE “L” in LIT

It only makes up 5% of the
knowledge and concepts we teach.

8. Liquidity

Retail traders 'using' liquidity.

If you **CAN'T SEE** the **LIQUIDITY**
THEN
You **ARE** the **LIQUIDITY**!

8. Liquidity

Think about it this way:

Every time there is a BUY or SELL people are matched up with opposing orders.

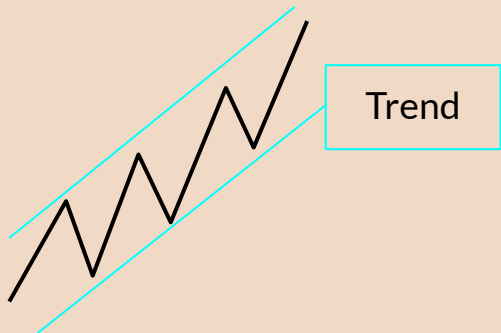

When a SL is hit the Same is TRUE! For example when a SL for a BUY is hit, someone losses their buy position and someone else BUYS it back for a discounted price!

It's Part Supply & Demand, but deeper than that. It's understanding everyone else's positions in the market.

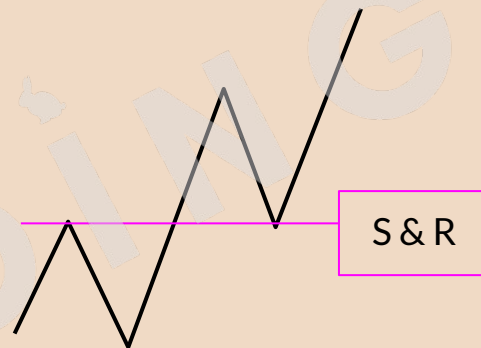

8. Liquidity

Basic LQ creation

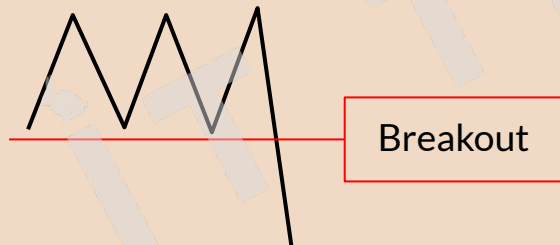

Trend

Orders being built in the direction of market movement in one continuous direction.

S & R

The not only picks up BO traders orders but 'Flip Flop' traders. In hopes for continuation.

Breakout

Picks up orders after some type of structure to the left has been broken in hopes that it continues in that direction.

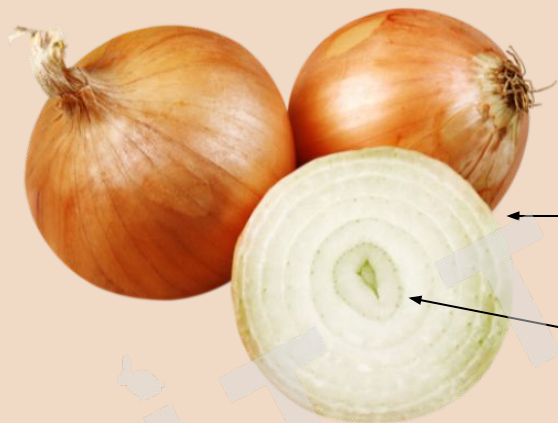

SMC

Smart Money Continuation from reversal picks up orders relating to smart money concepts.

Smart Money

This is Smart Money Concepts

See the Layers?

Smart Money Traps

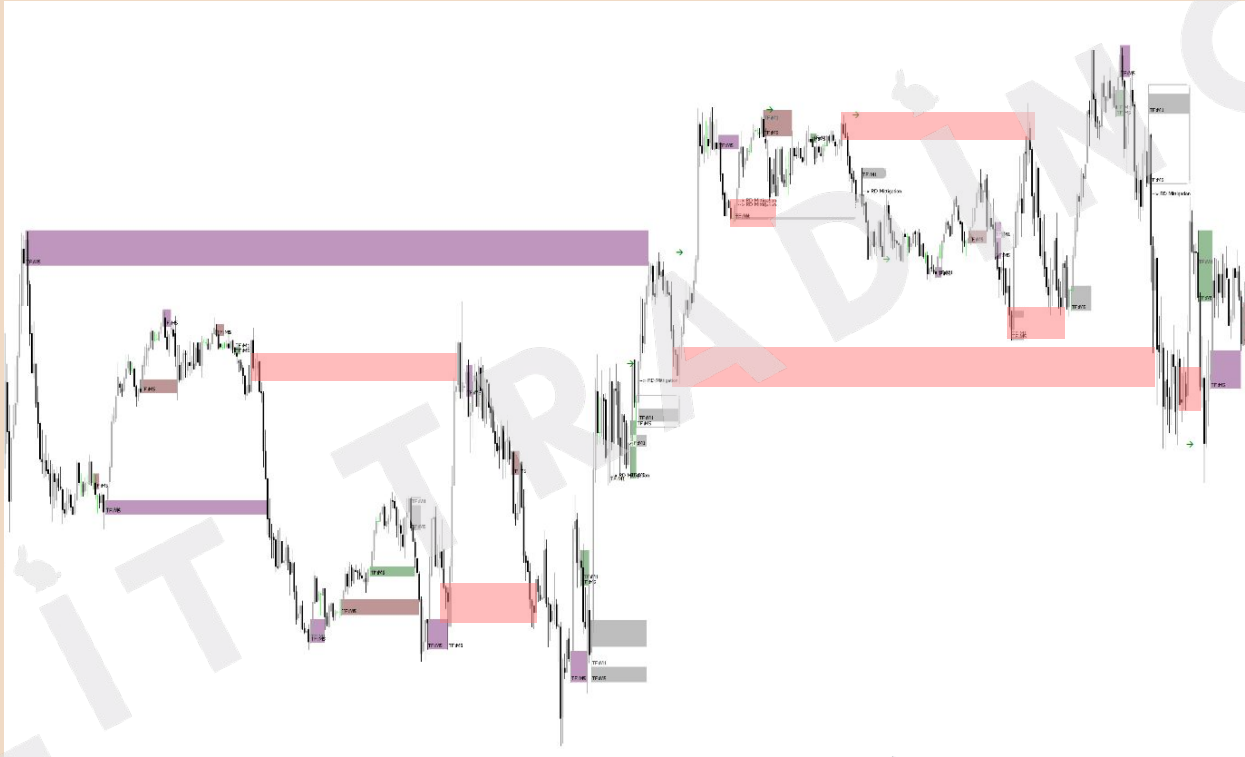

When you cut through the SM Onion

You uncover the harsh reality.

SM becomes LQ

80% of ALL Smart Money interest areas **FAIL!** Inducements are the key!

Smart Money

This doesn't mean Retail / SM Concepts Doesn't
Work At All.

It can work, and does work for some.
It's just not optimal, and not a long term solution.

Remember

Everyone was once there, **we were even there before!**

We don't want you to go through the same
Pain as we did!

**You need to combine it with
multiple different Confluence
of Events in order to get the
best out of it!**

The pre LIT Basic Master MAP

Builds up orders in a Trend in single direction.
"It's going to continue forever"

Creates BO Traders & S/R Traders to take these trades.

BoS

Breaks out of prior structure

Building up orders here to take both sides 'out' making BO traders take a trade but stopping them out immediately.

Supply & Demand fulfilled! Order Picked up and going the correct direction.

Builds up orders in a Trend in single direction.

10. Inducements

 **inducement**
/ɪnˈdʒuːsm(ə)nt/
noun

a thing that persuades or leads someone to do something.
"companies were prepared to build only in return for massive inducements"

Similar: incentive attraction encouragement temptation incitement ▼

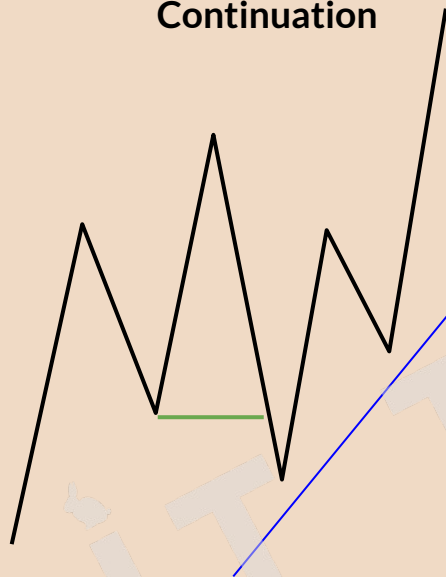

- a bribe.
"it is claimed that she was offered an inducement to plead guilty"

- People are **induced** to do things all the time, in the market we talk about mass psychology and how the rest of the world is being fooled to take their 'retail trade'.
- **DO NOT** fall for the same tricks, **SEE** the **PAIN** in the **MARKET**!

10. Inducements

Continuation

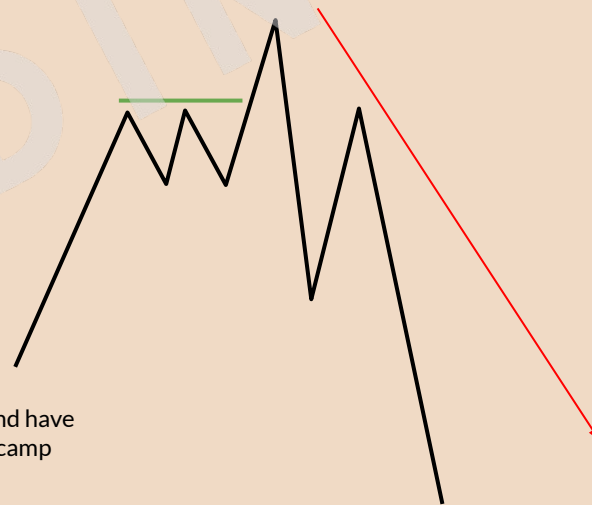

Continuation inducement makes people think the trade is going in the opposite direction the market actually is going.

In order to push price higher, it has to induce low first

Inducements are a full topic as it's own and have their own curriculum inside our LIT bootcamp

Reversal

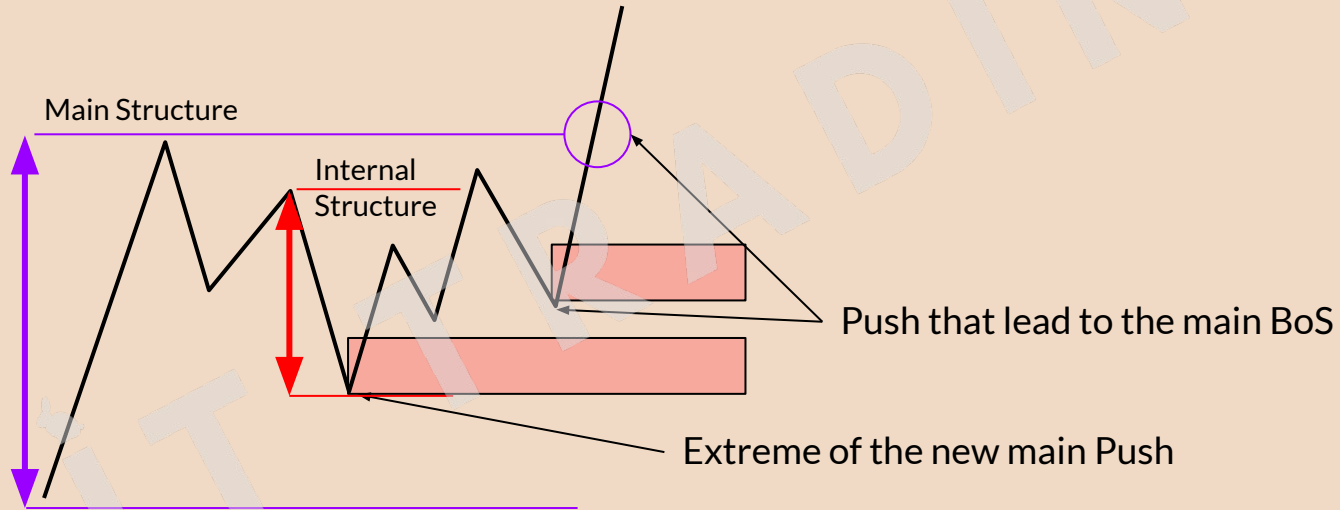

Reversal inducements make traders believe the market is continuing in their direction, creates a false hope and then reverses when the most Retailers have taken the trade.
